

LocalLe

Where your name carries weight again — because your reputation is your greatest currency.

Vision & Problem Statement

Transforming Nigeria's \$1.4 trillion informal service economy through trust and technology

The Vision

Create Africa's most trusted peer-to-peer marketplace where social validation replaces anonymous transactions, enabling anyone to safely buy and sell services within their community.

For Service Seekers

- ✦ "How do I know this plumber is trustworthy?"
- ✦ "I need help right now, not in 3 days"
- ✦ "What if I pay and they don't show up?"

For Service Providers

- ✦ "How do I prove I'm reliable?"
- ✦ "Where can I find customers who trust me?"
- ✦ "How do I get paid securely?"

Solution Overview

Three layers of trust that transform how Nigerians connect and transact

Social Vouching

Services need community endorsements before going live. Friends, past clients, colleagues vouch for your skills, building credibility before your first transaction.

Identity Verification

NIN verification via QoreID for all sellers. Real-time government database checks with auto-filled verified profile information.

Secure Transactions

Payments held in escrow until work is completed. Both parties must confirm satisfaction before fund release, with dispute resolution for issues.

Real-Time Matching Engine

Finds nearest available providers in under 2 minutes using advanced geospatial algorithms that consider both proximity (70%) and trust scores (30%).

Request Help

Find Providers (10km radius)

Rank by Proximity & Trust

Send Offers to Top 3

User Personas

Real people with real needs - all unified under one platform

A

Amara

Marketing Manager, 28

Goals: Find reliable help quickly, avoid scams, safe transactions
Frustrations: Fake reviews, no-show providers, payment risks
Journey: Starts as buyer, becomes hybrid user offering design services

C

Chinedu

Plumber, 35

Goals: Find more customers, get paid fairly, build reputation
Frustrations: Customers not paying, unreliable jobs, no verification
Journey: Service provider who also uses platform as buyer

T

Tunde

Student, 22

Goals: Earn extra money, build skills portfolio, flexible work
Frustrations: No platform for small jobs, hard to prove reliability
Journey: True hybrid - buys and sells multiple services weekly

Unified User Journey

One profile, multiple roles - seamless switching between finding help and offering help

The Unified Experience

Every user is just a "LocalLe User" who can seamlessly switch between finding help and offering help with one unified reputation that builds across all activities.

1

Instant Registration

Phone + Name + Password → Immediate access

2

Contextual Onboarding

Personalized guidance based on actions

3

Smart Permissions

Ask for info when it makes sense

4

Natural Discovery

Browse → "I could do that!" → Create service

Progressive Registration

Start with just phone number and name. Add email, location, NIN verification only when needed for specific features.

Seamless Role Switching

No separate "buyer" or "seller" modes. One dashboard shows both services you need and services you offer.

Real User Scenario: Amara's Hybrid Journey

Day 1: Urgent Need

Sink leaking → Finds Blessing → Great experience → Browsing → Sees design services → "I do this for my job!"

Day 7: Realization

Day 14: Hybrid User

Morning: Books photographer | Afternoon: Gets hired for design

Core Features & User Flows

Comprehensive feature set designed for trust, speed, and security

Service Creation & Vouching System

Create Service

0 Trust Points

Friends & Network

Collect Endorsements

Trusted: +50pts
Quick: +10pts

Service Active

100+ Points

Service States

- ✦ **Draft:** Created but inactive (0 trust points)
- ✦ **Vouching:** Collecting endorsements
- ✦ **Active:** Reached 100+ points, visible in marketplace

Vouch Types

- ✦ **Trusted Vouch:** +50 points from registered users
- ✦ **Quick Vouch:** +10 points from non-users via OTP
- ✦ **Retraction Penalty:** -75 points if withdrawn

Escrow Payment System

Payment into Escrow

100% secured

Service Completion

Provider marks done

Buyer Confirmation

24-hour window

Fund Release

Automatic or dispute

Dispute Resolution

- ✦ **24-hour automated mediation** first attempt
- ✦ **Admin escalation** for unresolved cases
- ✦ **Partial refunds** based on work completion
- ✦ **Binding decisions** by platform administrators

Bidirectional Review System

- ✦ **24-hour blind period** - reviews hidden
- ✦ **Prevents retaliatory ratings**
- ✦ **Mutual release** after period ends
- ✦ **Universal trust score** from all reviews

Technical Architecture

Robust, scalable infrastructure built for performance and security

Frontend

Vue.js SPA with responsive design, real-time WebSocket connections

Backend

FastAPI (Python) with async support, JWT authentication

Database

PostgreSQL

Cache

Redis for real-time provider locations and sessions

External Integrations

QoreID

NIN verification against government database with auto-filled verified information and compliance with Nigerian regulations.

Payment Gateways

Paystack/Flutterwave integration for secure payment processing, escrow fund management, and automated payouts.

SMS Services

Termii/Twilio for OTP verification, real-time notifications, and status updates delivery.

Success Metrics

Measurable targets for platform performance and user satisfaction

< 2min

Dispatch Response

Average request to acceptance time

90%+

Completion Rate
